Brownstown Central High School
Dual Credit Program

Brownstown Central High School offers students the opportunity to earn college credit while in high school. All of our dual credit courses are offered through Ivy Tech Community College in Columbus.   **The best part is that these classes are free!!!**

Brownstown Central offers The Indiana College Core!
The Indiana College Core is a 30-credit-hour block of general education college-level coursework that transfers from Indiana high schools to public institutions as well as between the state's institutions. Students who earn the Indiana College Core will take college core classes in English, Math, Science, Social Studies and German.

How does the process work?
1) At the beginning of the trimester, guidance will assist with online registration. The student must sign and complete the dual credit application.
2) Students must qualify for dual credit by receiving a 2.6 GPA and/or obtain a certain score on the SAT, ACT, PSAT, or the Ivy Tech placement exam.
3) Students have the option of dropping the dual credit portion of a class if they feel as though they will not be able to earn a C or better in the course.
4) At the end of the high school course the student's grade will be posted on an Ivy Tech transcript in Columbus.
